

[illegible]

The Trimline Leaf Trapper is ideal for installation in areas with high leaf and debris collection prior to a pool's finer filtration system. The Trapper is compact and economical, perfect for negative edge pools and in floor cleaning stems.

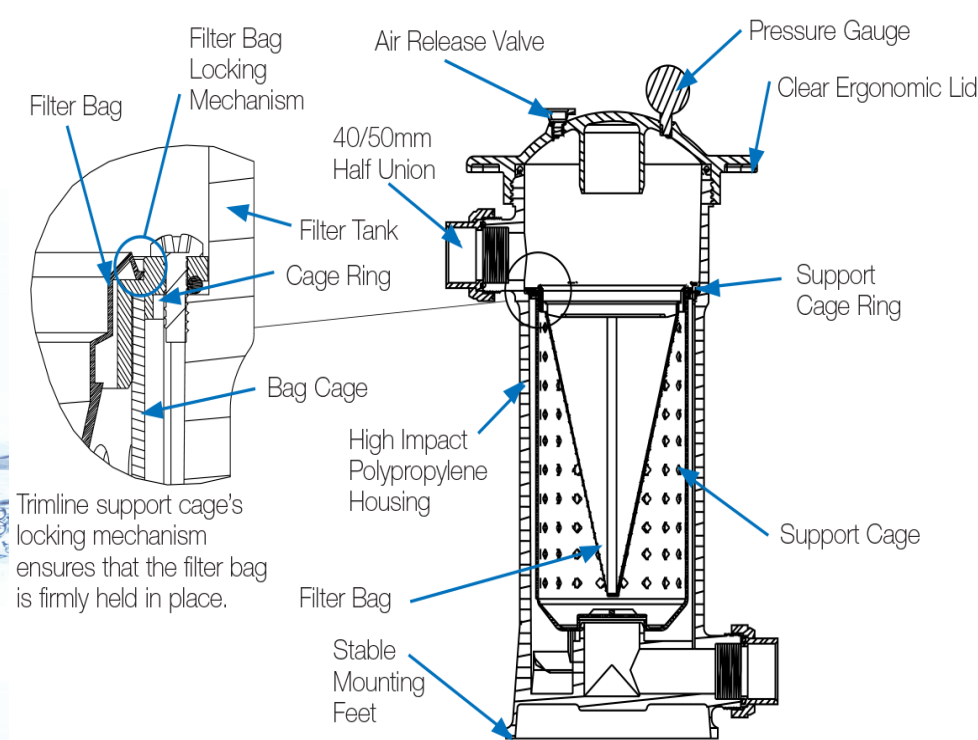

- Traps leafs and bigger debris
- Large 800 Micron filter bag
- One piece molded construction
- Clear handled lid
- 2" inlet and outlet

Leaf Trapper

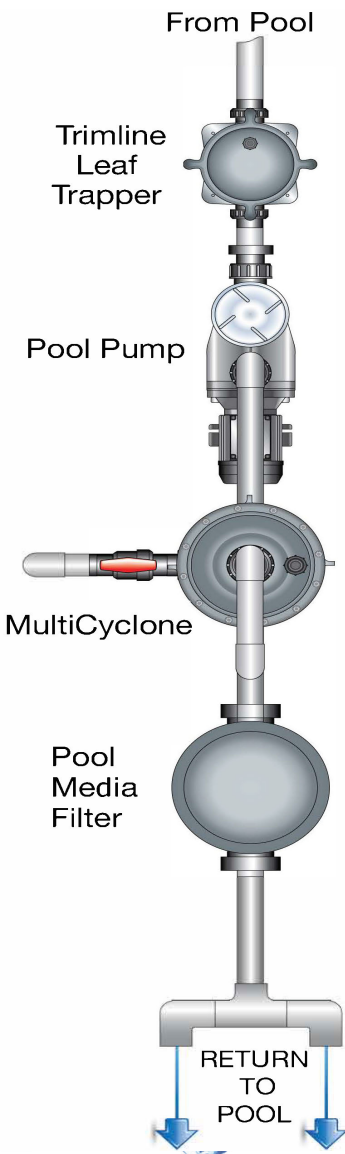

The Leaf Trapper housings are constructed from high impact polypropylene and a clear polycarbonate lid provide a strong and durable filter. The design of the ergonomic screw down lid enables simple hand operation and quick filter cleaning or replacement.

Leaf Trapper Filter Bag

Its large filter bag is made of high strength and durable nylon, plus it's easy to clean. The 800 micron bag allows a full flow of water with minimal resistance, and it has a holding capacity is approximately four-times the usual leaf and debris holding capacity of a standard pool skimmer leaf basket.
